EXTERNAL DEFIBRILLATOR - AED

The convincing feature of the new PRIMEDIC™ HeartSave is its easy, safe and speedy operation. With the new biphasic "Current Controlled Defibrillation" pulse, we are setting new standards in defibrillation technology. The device performs an automatic ECG analysis within 12 seconds and decides whether a defibrillation is necessary. Then a touch of a button is enough to trigger the life-saving electric pulse that eliminates the ventricular fibrillation. Thus valuable seconds and minutes are used to save life.

A range of 4 models available: use for patients > 8 years or > 25 kg

RESCUE LIFE BIPHASIC DEFIBRILLATORS

Reactive Life is an external defibrillator with monitor. It is designed to be used by out-of-hospital and hospital users. Lightweight, transport facility, attractive line, ergonomic shape, studied in every details. It is a complete acute cardiac care response system designed for Basic Life Support (BLS) and Advanced Life Support (ALS) patient management protocols. The IXP4 standard permits the operator under adverse climatic situations

Rescue Life is totally MADE IN ITALY.

SpO2 and pacemaker

Range includes models with pacemaker and SpO2. ECG module includes up to 12 derivations Standard 5 leads patient cable (for I, II, III, aVL, aVR, aVF) or optional 10 leads patient cable (for 12 derivations)

TFT LCD colour display 5.7”

High, bright, contrast, wide-angle colour display for simultaneous view of up to 3 ECG channels.

Data management

The memory is based on a flash disk of 2 GB for 2,000 recorded hours for all AED models.

Asynchronous and synchronous

- In asynchronous defibrillation, Rescue is advised on patients with the following symptoms: unconsciousness, absence of normal breathing and lack of detectable pulse.
- In synchronous defibrillation, Rescue Life is advised on patients with ECG’s reporting Atrial Fibrillation.

Operation modes

- In manual mode REACTI LIFE is intended for use by health care professionals and emergency rescue personnel who have been trained in advanced cardiac life support. Only 3 steps operations: energy selection, energy charge and shock.
- In AED mode, REACTI LIFE is intended for use by personnel authorized by a physician or medical director. The voice prompts and display messages are assisting the operator during CPR operations, charging automatically to 1500 when a shockable ECG rhythm is detected.
- In advisory Mode, the system alerts when the shock is necessary leaving the energy level and charging choice to the operator.

Clinic test

AMBU® AuraOnce™ Disposable Laryngeal Masks

AuraOnce has a special curve that carefully replicates natural human anatomy. Molded directly into the tube, the unique shape makes correct insertion easy without abrading the upper airway. AuraOnce’s curve also ensures that the patient’s head remains in a natural supine position when the mask is in use without extra stress on the upper jaw. Moreover, AuraOnce is specially designed to give the airway tube the flexibility needed to adapt to individual anatomical variances and wide range of head positions. AuraOnce has a D-shaped airway tube that is specially designed to give the airway tube the flexibility needed to adapt to individual anatomical variances and wide range of head positions. The halogen light source in the handle is conducted to the tip of the blade through an extra large fibre optic bundle (external Ø 5.0 mm) to produce a cold light, brighter illumination. All F.O. bundles can be easily removed during sterilization procedures to prevent damages and assure a longer life to the unit. The range includes both Mc Intosh and Miller blades, handles with 2.5V standard battery or 3.5V rechargeable battery and LED handles.

**MASK FOR MOUTH-TO-MOUTH REANIMATION**

- **34216 LIFEKEY MASK**
  Pocket mask for mouth-to-mouth reanimation.
  Its special one-direction valve allows oxygen to flow straight to the patient and minimizes risks of cross-contamination. Single-use, sterile, made in atoxic transparent material, easy to use and carry. Suitable for adults and children. Minimum order: pack 10 pcs.

- **34218 CPR MASK**
  The CPR pocket mask is a non-invasive, latex free mask with an integral non-rebreathing valve and efficient filter to prevent direct mouth contact with the patient’s face when providing mouth-to-mouth resuscitation. It can be used on adult, child and infant. Supplied in a compact plastic box with a corrugated tube for an easier use.

**AIRWAY**

- **34278 AIRWAY**
  For adult/children
  Composed of a mouthpiece, a special one-way non-rebreathing valve and a transparent cardiopulmonary resuscitation mask. It protects the rescuer from the patient’s exhaled gases, minimizing the risk of contamination. The special valve allows oxygen to flow freely in one direction straight to the patient, while the noxious vapors exhaled by the patient exit through the side port of the valve, ensuring maximum efficiency and hygiene. Mask’s transparency allows the rescuer to detect any matter regurgitated by the patient.
